

ASK FOR OUR NEW
"SOLUCIONES DE
AISLAMIENTO EN EL SECTOR
HOTELERO" MANUAL

Energy Efficiency Consulting for the Hotel Sector

The consulting is a part of the "Plan PIMA Sol" programme which seeks to promote energy rehabilitation in hotel facilities⁽¹⁾.

ISOVER Insulation Solutions help businesses to obtain "Plan PIMA Sol" subsidies.

A team of insulation experts will be offering technical advice on questions related to Energy Efficiency in buildings of this type.

ISOVER Solutions reduce energy demands in hotels and similar buildings by up to 90%, easily complying with all "Plan PIMA Sol" specified requirements.

The "Plan PIMA Sol" programme is open to hotels having energy rehabilitation projects in place which bring about a minimum efficiency improvement that will raise the building's energy rating either by at least two letters or by reaching letter "B".

(1): Royal Decree 635/2013 of 2nd August implementing the "PIMA Sol Hotel Sector Environmental Promotion Plan", aimed at promoting energy efficiency in hotel facilities, regulates the acquisition of future carbon credits as part of the Carbon Fund for a Sustainable Economy.
